

Recycle: How to Berlin

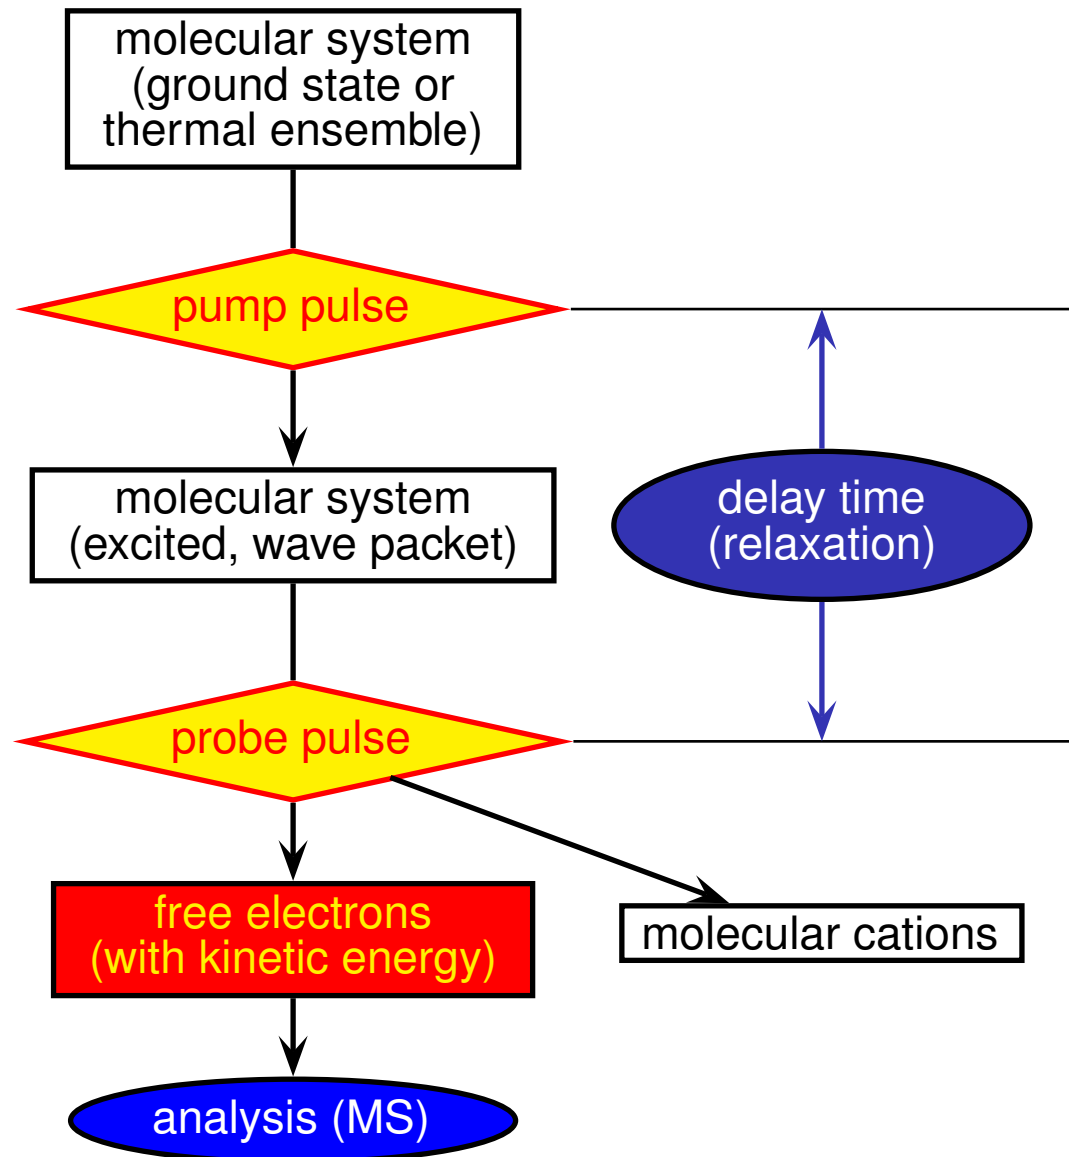

Andreas Ziegler et al.

4th Hackathon @ Digital Career Institute, Berlin, 30.04.2019

Capabilities: theory vs. experiment

- theory: each arbitrary laser pulse
- populations of eigenstates:
 $P_n(t) = \langle \Phi_n | \Psi(t) \rangle$
- direct measurement of population dynamics impossible
- pump-probe experiments are performed

Simulation of pump-probe spectra
